This publication is protected by copyright under the Commonwealth of Australia Copyright Act 1968.

NATA's accredited facilities or facilities seeking accreditation may use or copy this publication or print or email this publication internally for accreditation purposes.

Individuals may store a copy of this publication for private non-commercial use or copy a reasonable portion of this publication in accordance with the fair dealing provisions in Part III Division 3 of the Copyright Act 1968.

You must include this copyright notice in its complete form if you make a copy of this publication.

Apart from these permitted uses, you must not modify, copy, reproduce, republish, frame, upload to a third party, store in a retrieval system, post, transmit or distribute this content in any way or any form or by any means without express written authority from NATA.

This document lists the descriptors for services currently able to be accredited for food and beverage.

In addition to referencing ISO/IEC 17025, food and beverage and the applicable services listed below, scopes of accreditation will include the material/item/product tested, the determination, the technique used and the procedure adopted.

The list below will be updated as new services are accredited.

Services
Accreditation is held to establish new branch sites
Analysis of algaecides
Analysis for allergenic proteins
Analysis for antioxidants, colourants, preservatives, other additives
Analysis for bacteriophage
Analysis for chlorinated dioxins and dibenzofurans
Analysis for elements
Analysis for enteric protozoa
Analysis for free-living protozoa
Analysis for helminths
Analysis for herbicides
Analysis for histamine
Analysis for insect infestation
Analysis for macroinvertebrates
Analysis for microinvertebrates
Analysis for microorganisms
Analysis for mycotoxins
Analysis for non planktonic microalgae and cyanobacteria
Analysis for phenols
Analysis for planktonic microalgae and cyanobacteria

Services
Analysis for polyhalogenated biphenyls
Analysis for pyrethroid and pyrethrum pesticides
Analysis for residues and contaminants (hydrocarbons, phthalates, industrial chemicals)
Analysis for synthetic pesticides
Analysis for veterinary chemical residues
Analysis for vitamins
Analysis of agricultural chemical residues and contaminants (excluding pesticides, herbicides, fungicides and rodenticides)
Analysis of biotoxin residues and contaminants
Analysis of cannabinoids
Analysis of fungicide residues and contaminants
Analysis of pesticide residues and contaminants
Analysis of pharmaceutical residues and contaminants
Analysis of physical and nutritional characteristics
Analysis of polybrominated diphenylether residues and contaminants
Analysis of rodenticide residues and contaminants
Challenge testing
Ecotoxicology studies
Food anti-microbial screening
Investigative analysis of materials for unknown substances
Legal management - Forensic Operations Module
Measurement of ionising radiation
Meats and fish species testing
Molecular analysis - Bioinformatic analysis and interpretation

Services
Molecular analysis - Extraction
Molecular analysis - Sequencing - Allele typing
Molecular analysis - Genotype fragment separation
Molecular analysis - Ion torrent
Molecular analysis - Sequencing - Next generation (MPS)
Molecular analysis - Sanger
Mycological analysis
Public health investigation of food and beverages
Sample collection
Sensory evaluation tests
Shelf-life tests

Amendment Table

The table below provides a summary of changes made to the document with this issue.

Amendment
Service descriptor Molecular genetics amended to Molecular analysis
